and CUSTOM MILLWORK

Proudly Serving the Millwork  
Industry for over 28 Years

# Enhance your home or office ... with a great first impression!

Create a warm invitation – and a lasting first impression – with solid wood doors. Each Locklando door is handcrafted in standard and custom sizes, and designed to blend with any architectural style. We never use veneers in the construction of our doors!

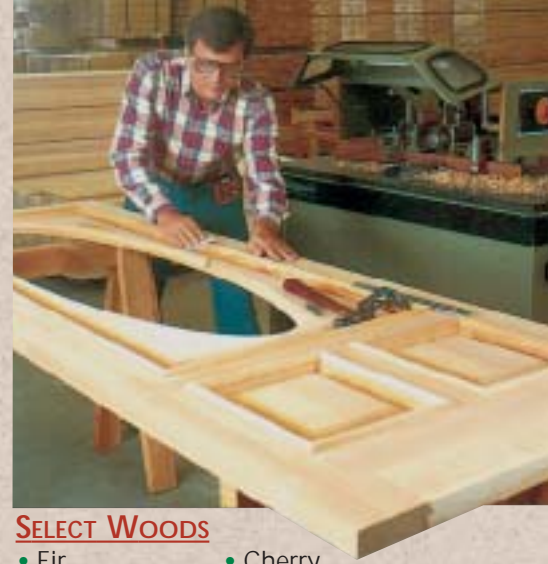

The **"Signature Series"** features original glass designs, hand-etched by glass artists and offers a wide selection of styles to choose from. Personalized names and business logos are also available upon request.

The **"Plantation Series"** features another line of designer glass that brings together a combination of beveled glass, glue chip and antique glass handsomely assembled with brass came. This delicate beauty is protected by clear glass on each side to form a full 1" insulated unit. This provides not only a higher insulating value, but also ease of cleaning.

Our most recent creation, the **"South Beach Series"**, features uniquely curved bars, beveled glass and raised panels. This series offers innovative designs for a classic traditional style or a contemporary approach. This graceful and sophisticated design is certain to create a lasting impression.

At Locklando Door & Millwork, Inc. we also manufacture custom sidelites and transoms with the same quality standards and attention to detail that we use to create our doors. Matching jambs and moldings are also available to help complement that special project.

Locklando Doors – when only the finest will do!

# Custom Designed Especially for You!

If you're looking for that special entryway that reflects your personal style, consider a custom designed entry unit by Locklando Door and Millwork. The options are endless – from unique doors to a complete entry unit that includes matching sidelites and a dramatic eye-catching transom.

- Transoms are available in square, rectangular, half round and elliptical configurations.
  - Doors custom made in a wide variety of sizes, styles, and species of wood.
  - Sidelites available to match every door we make.
  - Specialty glass options include complete custom hand-etched scenes or beveled and glue chip decorative lites with brass or zinc caming.
- The possibilities are endless...because at Locklando Door and Millwork every door, every entryway, is made to your specifications...Especially For You!

So if you're looking for that special door that creates a unique architectural statement, look to us, because at Locklando Door and Millwork that's what we do.

\* All doors are pictured from the outside.

LDM401

LDM412

LDM406

LDM400

LDM410

LDM405

At Locklando Door and Millwork, each door we make is handcrafted with a keen eye for detail and fine craftsmanship. No series illustrates this handcrafted quality better than the South Beach. This door line offers solid wood stile and rail constructed panel and French doors that feature a gullwing design. Also, all of our French doors are true divide lite (TDL), no fake wooden grills here! We think their unique architectural lines speak for themselves. And these, like all of our doors, are available in a wide variety of sizes and species of wood, with matching sidelites.

# TRADITIONAL SERIES

If you're looking for a traditional style door made of solid wood or a custom size or wood species, Locklando Door and Millwork has the solution. From solid wood panel doors to true divide lite (TDL) French doors, we custom make any door to meet your specifications. Each door in our traditional series is handcrafted with the same eye to detail and craftsmanship as our custom designed doors. Like all of our doors, the traditional series is available in a wide variety of sizes and wood species.
